

Saguaro National Park - Saguaro Census Plot #3  
February 5, 2010 – Park Staff and Volunteers

In this figure, green columns represent the number of saguaros counted in 1990; red represent 2000 and blue represent 2010. Each column represents a size class; with small saguaros (less than 1 meter tall) on the far left side and large saguaros to the right, with the total number on the far right. There has been an increase of the number of saguaros on the plot since the last Saguaro Census in 2000.
